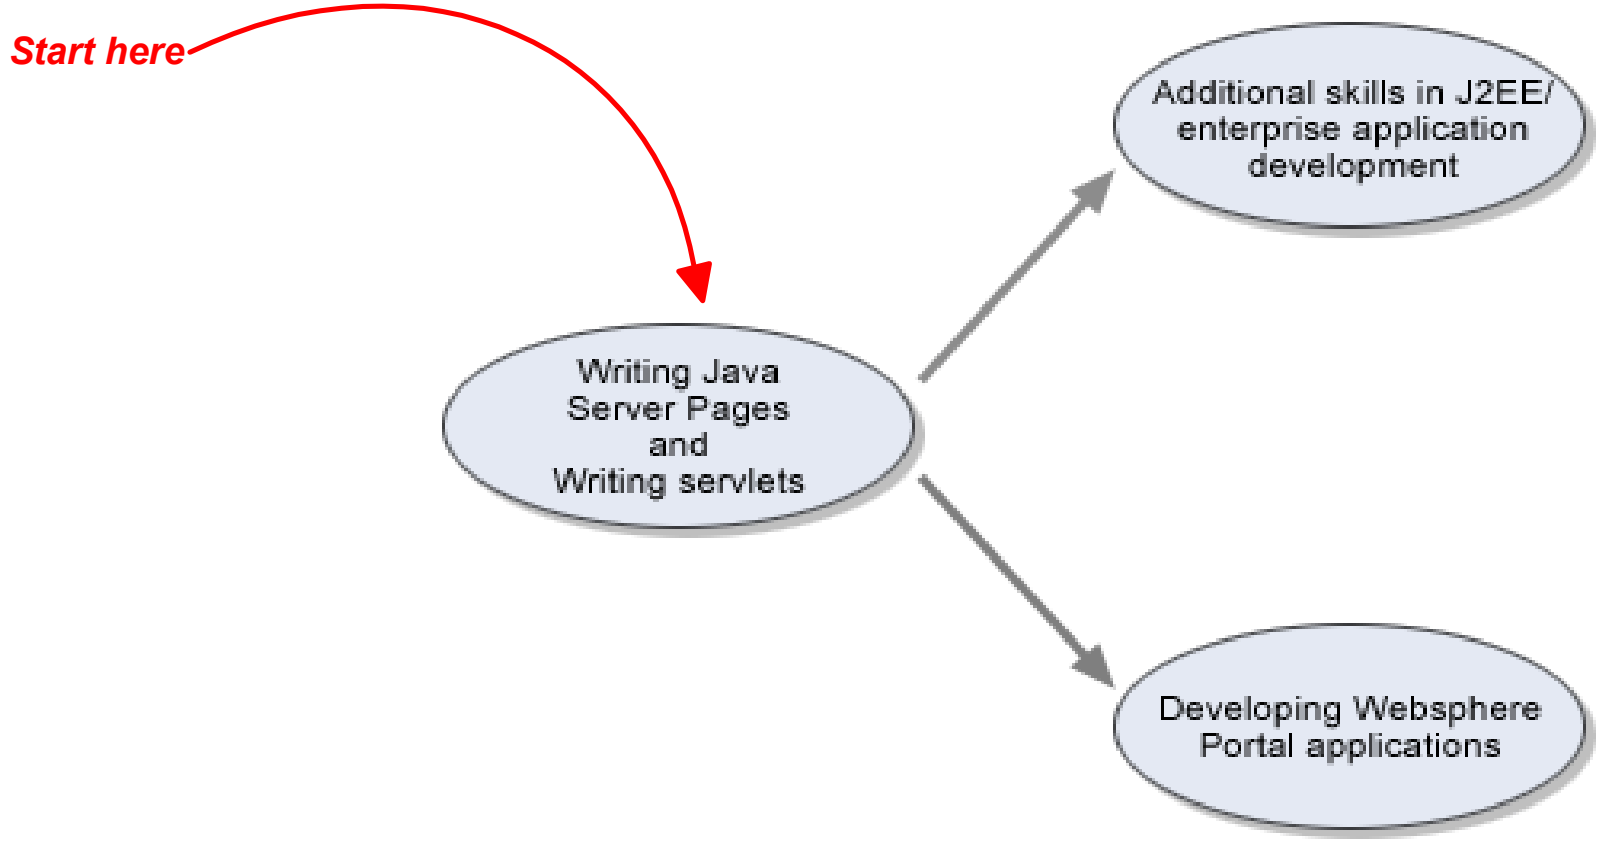
About the J2EE Skills Roadmap

- Lotus Education is addressing the development of Next Gen/J2EE solutions with a J2EE Skills Roadmap
- This roadmap:
  - Serves as a guide to the impact of product direction on training
  - Bridges the current Lotus application development skills to the skills and technologies of other software brands and to open standards
  - Provides options depending on skill levels and creates choices based on skills direction
- This is the first milestone in an ongoing effort. Adjustments and changes, resulting from the skill mapping and customer needs will occur.

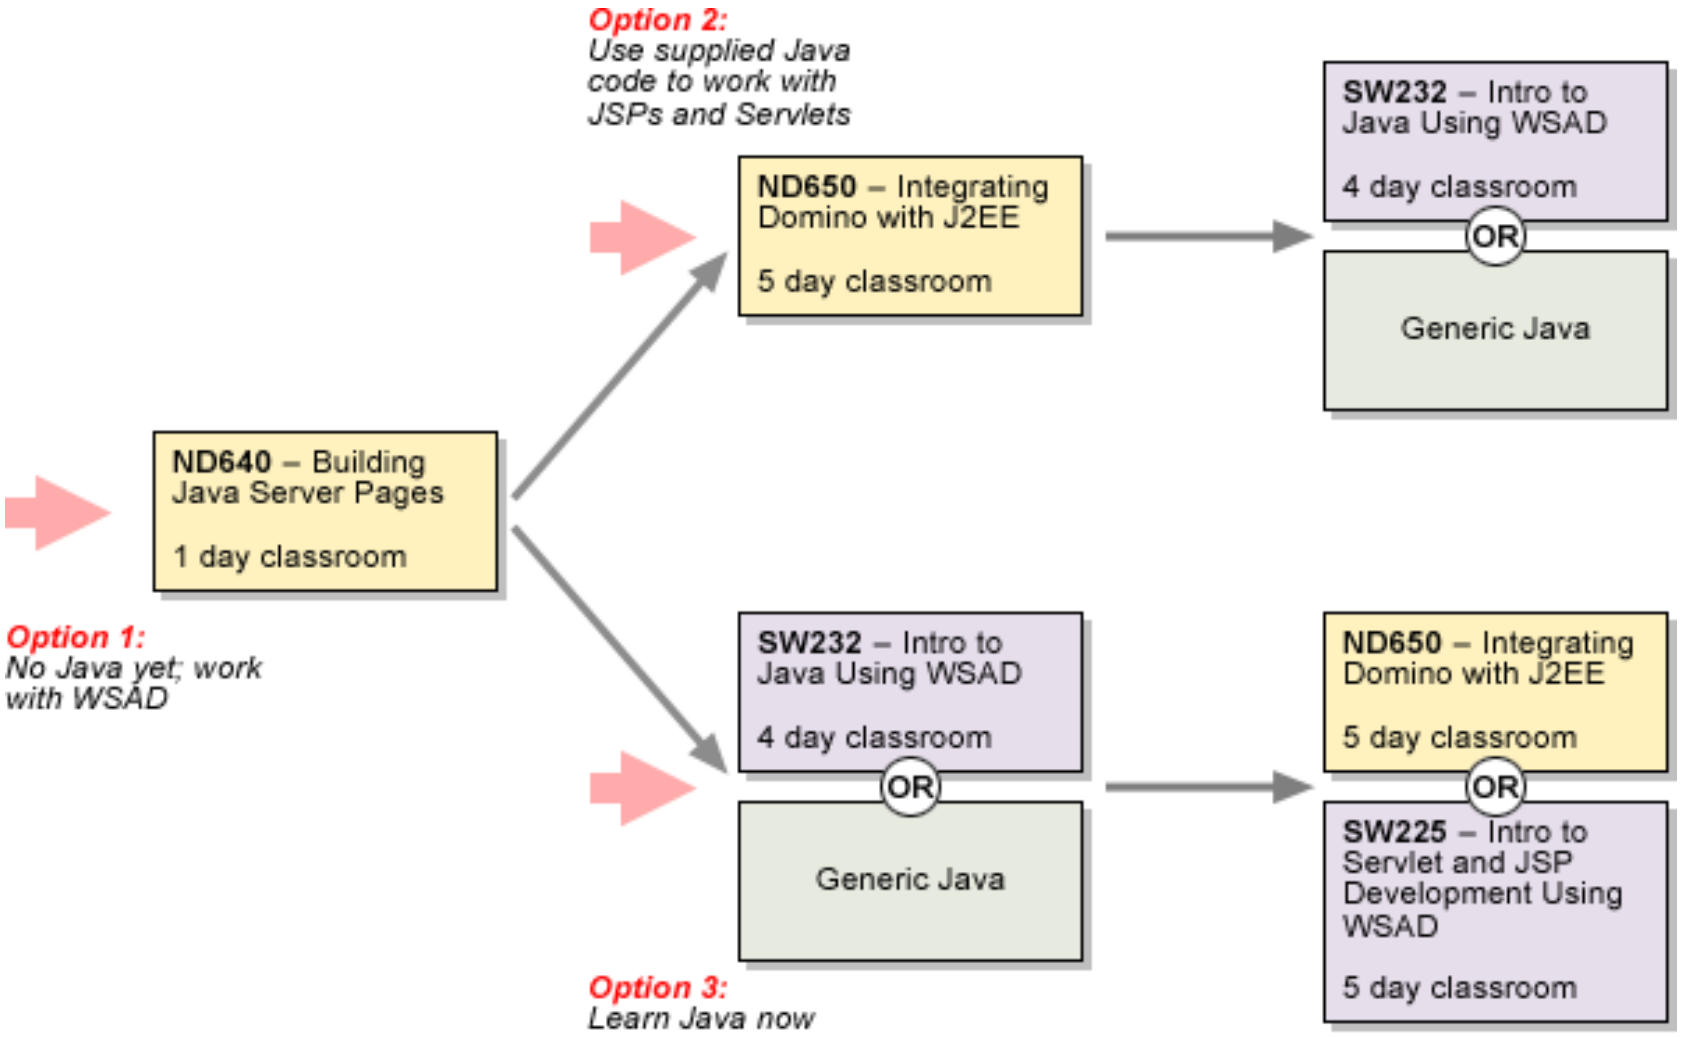
Roadmap for Domino developers

- Application developers looking to use Java/J2EE to write
  - Apps for Websphere (WS) Application Server
  - Apps for WS Portal
  - Portlets for WS Portal
- Recommended that Domino developers
  - Hold a Lotus professional certification
  - Are proficient in LotusScript

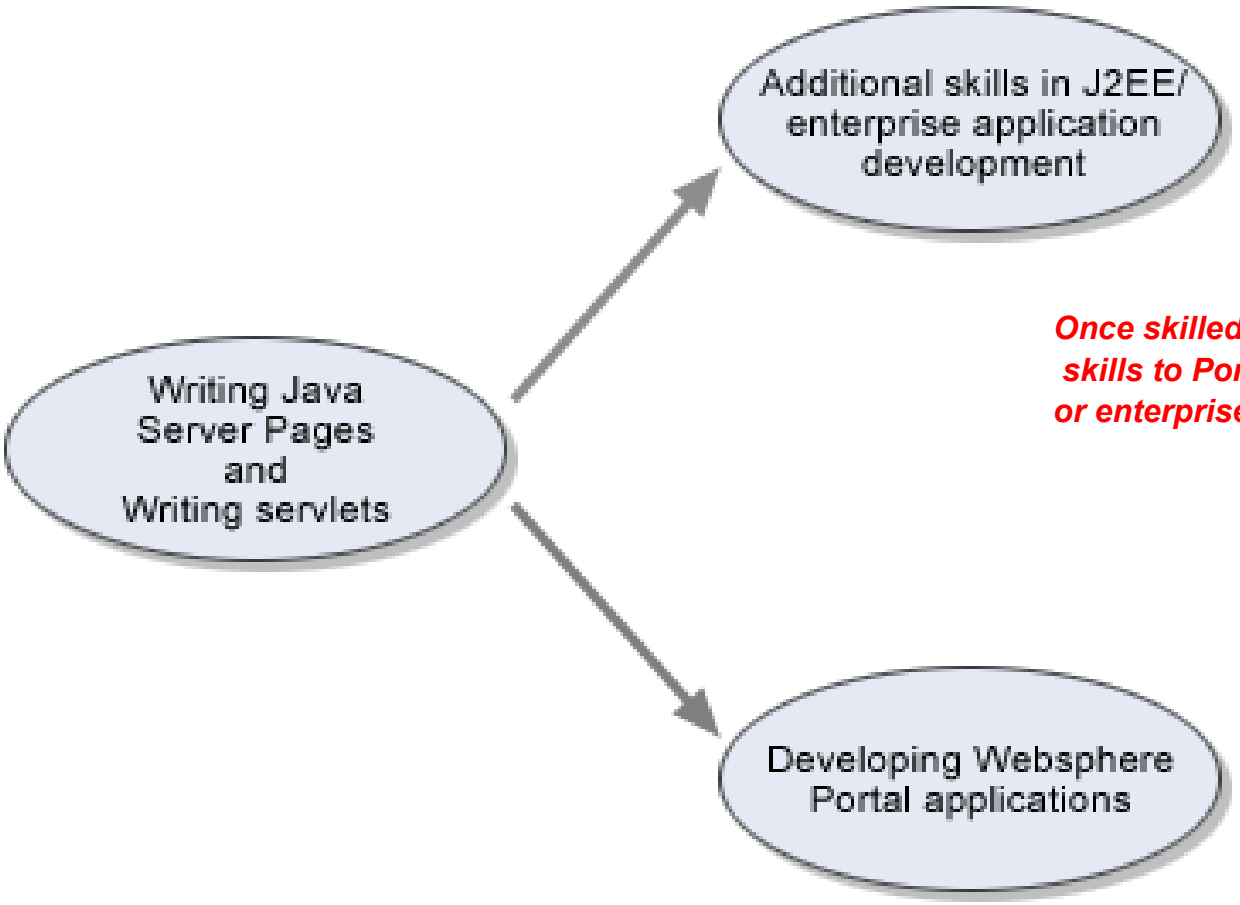
The J2EE Skills Roadmap: Choose the skill you want to develop



Writing Java Server Pages & Servlets: Choose your path



The J2EE Skills Roadmap: Extend your skills



Once skilled in JSPs & Servlets, Extend your skills to Portal Applications or enterprise-wide applications

J2EE Skills Roadmap: Extending skills to Portal apps

PW531 – IBM WebSphere Portal Version 4 Application Development

4.5 day classroom

Currently available
